## Fasteners of Catalogue

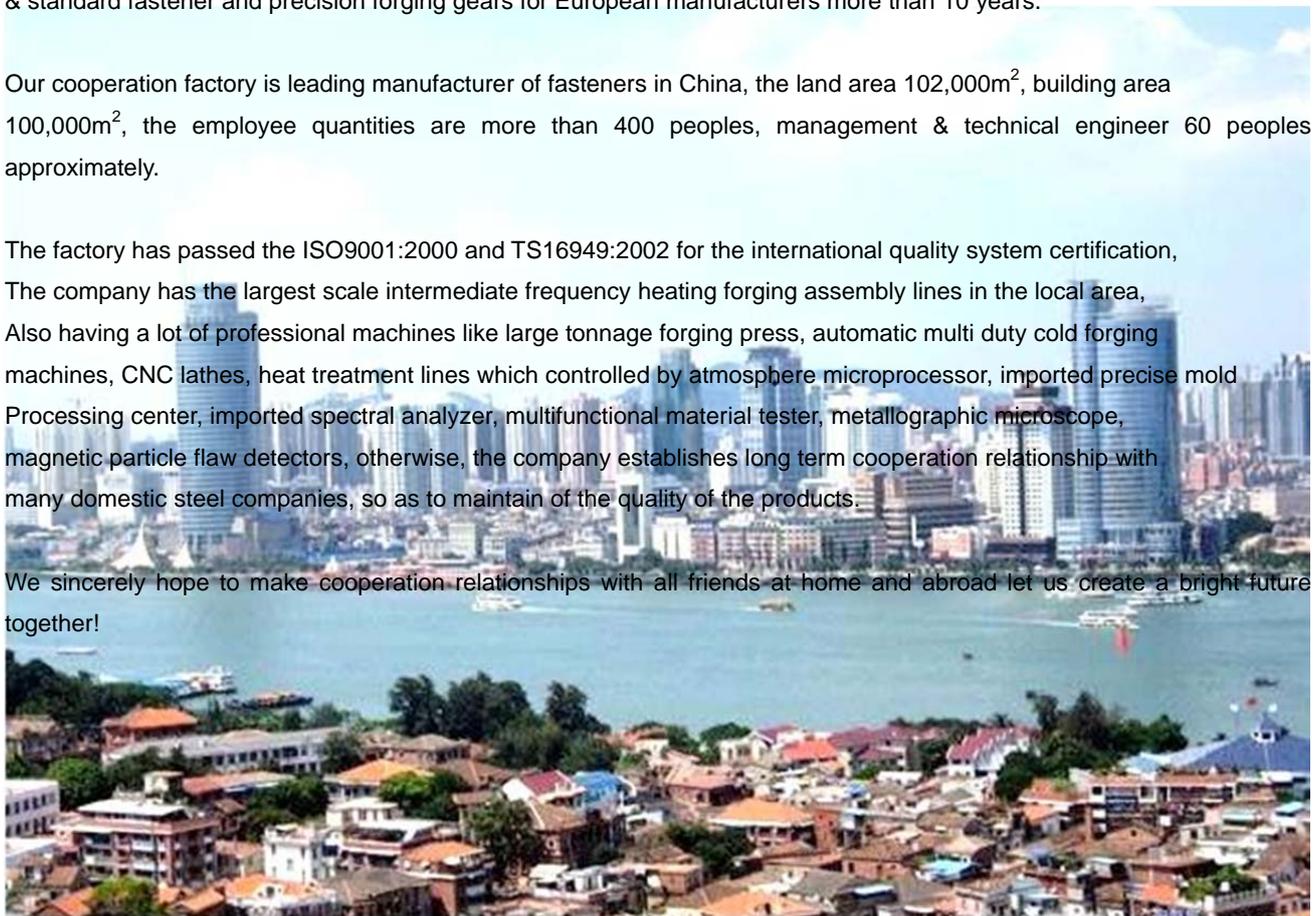

### About the factory

Xiamen Hadron Import and Export Co., Ltd is located in Xiamen China, a beautiful port city, beside the Taiwan island with the Taiwan straits and its transportation is very convenient. As a participant of the Global Supply Chain, we have provided 10.9 and 12.9 high tensile heavy trucks hub bolts & nuts, high tensile fasteners of earthmoving equipment & standard fastener and precision forging gears for European manufacturers more than 10 years.

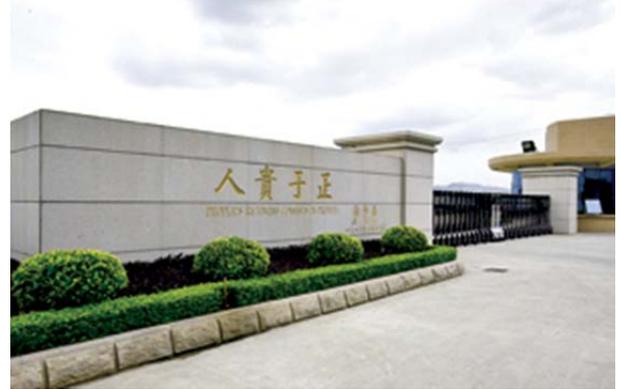

Our cooperation factory is leading manufacturer of fasteners in China, the land area 102,000m<sup>2</sup>, building area 100,000m<sup>2</sup>, the employee quantities are more than 400 peoples, management & technical engineer 60 peoples approximately.

The factory has passed the ISO9001:2000 and TS16949:2002 for the international quality system certification, The company has the largest scale intermediate frequency heating forging assembly lines in the local area, Also having a lot of professional machines like large tonnage forging press, automatic multi duty cold forging machines, CNC lathes, heat treatment lines which controlled by atmosphere microprocessor, imported precise mold Processing center, imported spectral analyzer, multifunctional material tester, metallographic microscope, magnetic particle flaw detectors, otherwise, the company establishes long term cooperation relationship with many domestic steel companies, so as to maintain of the quality of the products.

We sincerely hope to make cooperation relationships with all friends at home and abroad let us create a bright future together!

## Factory views

## Equipment

### The First Workshop

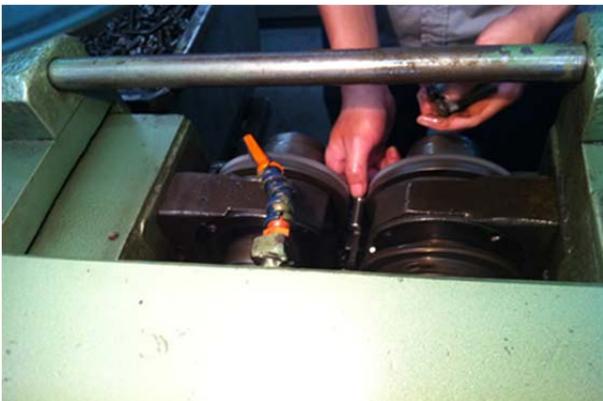

This workshop mainly finishes the following processing: Prepare raw material, cutting into pieces, heating forging and cold forging forming, and so on.

## The Second Workshop

This workshop mainly finishes the following processing: the mold making, rounding, knurling, rolling thread, and so on.

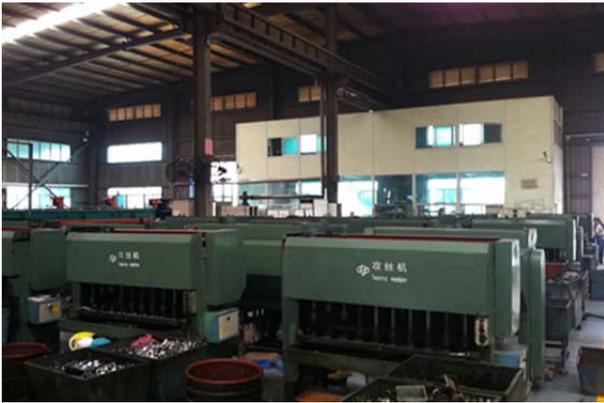

### The Third Workshop

This workshop mainly finishes the following processing: the large tonnage cold press molding, CNC milling, tapping, heating treatment, and so on.
